Greetings all. I've been slowly updating my Glowbugs webpage and have just added the first of many subpages which contain ARRL schematics and parts lists.

The page just recently added features 4 glowbug transmitter projects from the 1961 Handbook. I plan on adding more pages from other years as I get time. Please check the site from time to time for updates. If anyone wants

more information (ie, the text from the construction articles), please let me know. I'd be happy to scan and send the text and pictures to anyone via e-mail. Alas, I don't have the large web space available to afford the text on the site.

As always.. your comments and suggestions are very much welcome. I don't present the information for my use.. it's for your use... so if you feel there is something that can be enhanced.. please drop me a note.

Follow the links to my Glowbug site from:

<http://www.barepower.net/~carreiro/>

Keep on tickling the ether!

73 Paul N6EV

***** More "Odds-N-Ends"for sale (AGAIN)(REVISED)*****
Following items for sale or trade. Most items are "vintage radio/
boat anchor" items from the vacuum tube era!! Some prices readjusted
from previous post. I need to move it all out! (To make room for
newer "old" stuff, of course!)

BRITISH "AVO 8" Mk III Multimeter. Very accurate! Works very
well, with resistance range extension unit and instruction/
service manual (copies). Cosmetically VERY nice except for
one hairline crack in meter glass window. (Does not affect
operation!) This is the British "Roll-Royce" version of the
Simpson 260! With additional "Resistance range extension unit"
(Originally cost \$95 alone!) BEST OFFER over \$125! or TRADE?

EICO 377 Sine/square wave generator. Covers 20 to 200,000 Hz in
4 ranges continously. (Not 'step' tuning) working OK. Case needs paint.
With photocopy of manual. \$15 plus shipping/packing.

SIDEBAND ASSOCIATES SBA-312 Commercial Xtal controlled SSB transceiver. With crystals for 2,4,6,8,12, and 16 Mhz channels (Some old simplex marine frequencies) It runs 100 watts out and is semi-solid state. (Transmitter uses a pair of 6883B tubes) 115 VAC power supply built in. No book, no mike. Cosmetically good, a few scuffs, needs to be cleaned up. Worked OK last time used. (was an 'antenna tuner' test RF source in the shop I used to work in.) \$75 plus shipping/packing.

HALLICRAFTERS HA-1 "TO Keyer". Cosmetically good to excellent. Works OK. No book.
Best bid over \$50 plus shipping

HEWLETT PACKARD 614A and 616A RF Generators. The 614 covers 780-2200 Mhz and the 616A covers 1750-4400 Mhz. The 614A works fine last time I tried it! The 616A has a bad power transformer (I think) and needs some tubes (Tubes still in the RF cavities though!) I must get these out from underfoot! \$10 for BOTH to the first person to show up and pick them up! New Orleans area. I must move these out.

LAMPKIN model 105B Frequency Meter. No documents. Works. Cosmetically good. \$20 plus shipping.

I am open to trades. WHAT HAVE YOU?

Looking for General Radio test equipment,

Hallicrafters:

SX-71 receiver, S-76 receiver, SX-100 receiver.

BC-221 frequency meter chassis less tubes/crystal otherwise complete and in good cosmetic condition. B&W "TVL" or "HDVL" coils for 160, 80, 40 meters + Jackbar and swinging link assy. to match.

73,

Sandy, W5TVW

E. V. Sandy Blaize, W5TVW

"Boat Anchors collected, restored, repaired, traded and used!"

417 Ridgewood Drive,

Metairie, LA., 70001

ebjr@worldnet.att.net

Looking for: 860 tubes, WL-460 tubes, RK-18,20,28 tubes

Butternut HF2V antenna, G-R test gear.....*
